## Precious Metals

From straight-up platinum to peony laced with gold, makeup mines metals this spring season.

**Is your client** a gold-getter or a silver stunner? Either way, she's bound to find metallic eye shadows and liners to tickle her gilded fancy. Says Karen Bock of ColorStrokes Cosmetics, "Metallic shadows pick up the different flecks of color in our eyes, making them look livelier."

For bold, reflective eyes, take a style cue from the Prada runway and slather on a thick smudge of 24-karat gold cream or go the sparkle route with chrome shadow layered with multicolor glitter, a la Louis Vuitton. Seeking a more sublime glimmer? Dust beguiling bronze up to the brow bone with soft hints of glitzy silver on the lid to gently highlight, as seen at Celine. "To get in on the metallic trend without doing all-over glitter, try a matte shadow on the entire lid and add just a touch of metallic at the center of the lid and at the inner corner of your eyes," says Bock.
